Crash! Course John Graham, Monica Klinkan, 1996-03

Automobile Insurance Jean Lemaire, 2013-03-09 The mathematical theory of non-life insurance developed much later than the theory of life insurance. The problems that occur in the former field are far more intricate for several reasons: 1. In the field of life insurance, the company usually has to pay a claim on the policy only once: the insured dies or the policy matures only once. It is with only a few particular types of policy (for instance, sickness insurance, when the insured starts working again after a period of sickness) that a valid claim can be made on a number of different occasions. On the other hand, the general rule in non-life insurance is that the policyholder is liable to be the victim of several losses (in automobile insurance, of course, but also in burglary and fire insurance, householders' comprehensive insurance, and so on). 2. In the field of life insurance, the amount to be paid by the company excluding any bonuses is determined at the inception of the policy. For the various types of life insurance contracts, the sum payable on death or at maturity of the policy is known in advance. In the field of non-life insurance, the amount of a loss is a random variable: the cost of an automobile crash, the partial or total loss of a building as a result of fire, the number and nature of injuries, and so forth.

Crash Course Financial Technology Can Akdeniz, 2019-01-05 Fintech is the short form for Financial Technology. It can be defined as a measure to use technology to have a great access of financial aspects. Finance is the most important part of the working of an organization. It is that type of a department, that is responsible for the control of all the money that is involved in the business. From controlling the cost to handling the investment. Every aspect of money is surrounded by the finance department of the company. A company that lacks the measure to have a proper technique to control its finance as well as handling the finance that is available to it cannot survive in long run. The major aspects of the profitable company are molded as per the directions provided by the company's finance department. It is not limited to that but has importance to various other industries of the market such as financial institutes, insurance company, trading, etc.

A Crash Course on Financial Statements for Small Business Owners David H. Bangs, 2010-09 Fiona Finkelstein was born to be a ballerina--if she can get over her stage fright, that is. The first in the feisty and endearing Not-So-Ordinary Girl trilogy. More than catching fireflies, more than eating triple-hot fudge sundaes, and even more than waking up on the first day of summer vacation, Fiona Finkelstein wants to become a ballerina. There's just one problem: In her last recital, she starred as the unforgettable Fiona VOMITstein--her performance went all over the stage, and all over Benevolence Castles' cancan costume. Can Fiona overcome her fears and blossom as a big-time ballerina in *The Nutcracker*, even in a snowstorm? Or will she be the only person in her family to have the flat-out worst case of stage fright ever? Originally published as *Fiona Finkelstein, Big-Time Ballerina* .
