The Marketing Era Kalman Applbaum,2004-06-01 Marketing has situated itself as an indispensable tool in today's business world-an unavoidable step in the process from production to consumption. This book is the first of its kind to map out the organizing principles and cultural logic of marketing, and trace the profession's ascent to global domination. Applbaum argues that marketing can be seen as a particular set of cultural practices that surfaced in reaction to the affluence of Western society, and not the answer to the call of inherent human needs and wants. In order to understand globalization, transnational corporations, and the spread of consumer culture, one must understand the logic of marketing.

Spaces Speak, Are You Listening? Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening: the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and hear the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In *Spaces Speak, Are You Listening?*, Barry Blesser and Linda-Ruth Salter examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to see objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—*Spaces Speak, Are You Listening?* establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects.

The Wisdom Pyramid Brett McCracken, 2021-01-15 We're facing an information overload. With the quick tap of a finger we can access an endless stream of addictive information—sports scores, breaking news, political opinions, streaming TV, the latest Instagram posts, and much more. Accessing information has never been easier—but acquiring wisdom is increasingly difficult. In an effort to help us consume a more balanced, healthy diet of information, Brett McCracken has created the Wisdom Pyramid. Inspired by the food pyramid model, the Wisdom Pyramid challenges us to increase our intake of enduring, trustworthy sources (like the Bible) while moderating our consumption of less reliable sources (like the Internet and social media). At a time when so much of our daily media diet is toxic and making us spiritually sick, *The Wisdom Pyramid* suggests that we become healthy and wise when we reorient our lives around God—the foundation of truth and the eternal source of wisdom.

Next Generation Earth System Prediction National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Ocean Studies Board, Board on Atmospheric Sciences and Climate, Committee on Developing a U.S. Research Agenda to Advance Subseasonal to Seasonal Forecasting, 2016-08-22 As the nation's economic activities, security concerns, and stewardship of natural resources become increasingly complex and globally interrelated, they become ever more sensitive to adverse impacts from weather, climate, and other natural phenomena. For several decades, forecasts with lead times of a few days for weather and other environmental phenomena have yielded valuable information to improve decision-making across all sectors of society. Developing the capability to forecast environmental conditions and disruptive events several weeks and months in advance could dramatically increase the value and benefit of environmental predictions, saving lives, protecting property, increasing economic vitality, protecting the environment, and informing policy choices. Over the past decade, the ability to forecast weather and climate conditions on subseasonal to seasonal (S2S) timescales, i.e., two to fifty-two weeks in advance, has improved substantially. Although significant progress has been made, much work remains to make S2S predictions skillful enough, as well as optimally tailored and communicated, to enable widespread use. *Next Generation Earth System Predictions* presents a ten-year U.S. research agenda that increases the nation's S2S research and modeling capability, advances S2S forecasting, and aids in decision making at medium and extended lead times.

The Republican Alternative André Holenstein, Thomas Maissen, Maarten Roy Prak, 2008 The Republican Alternative seeks to move beyond the mere notion of scholarly inquiry into the republic—the subject of recent rediscovery by political historians interested in Europe’s intellectual heritage—by investigating the practical similarities and differences between two early modern republics, as well as their self-images and interactions during the turbulent seventeenth and eighteenth centuries. Among the world’s most economically successful societies, Switzerland and the Netherlands laid much of the foundation for their prosperity during the early modern period discussed here. This volume attempts to clarify the special character of these two countries as they developed, including issues of religious plurality, the republican form of government, and an increasingly commercially-driven agrarian society.
