*Pioneer to the Past (Abridged, Annotated)* Charles Breasted, 1945-01-01 The challenging and exciting life of James Henry Breasted spanned the most important years of the early western exploration of ancient Egypt. He was at the center of turbulent and world-changing events, including World War I and the discovery of the tomb of Tutankhamun by Howard Carter. An immensely talented scholar, he explored the Nile Valley and its antiquities in the late 19th and early 20th centuries, recording inscriptions and participating in digs with men like Petrie. At his side was his wife, as well as his son Charles, who wrote this admiring work about the life and times of his father. James Breasted was consulted with by such men as General Allenby during WWI. When Howard Carter discovered Tut's tomb in 1922, one of the first men he and his patron, Lord Carnarvon, contacted was Breasted. He not only saw the tomb shortly after its discovery, his effort to mediate between Carter and the Egyptian government when Carter was later locked out of the tomb is detailed here. You cannot understand ancient Egypt or modern Egyptology without knowing about Breasted's remarkable life. He was the founder of the Oriental Institute at the University of Chicago. For the first time, this long out-of-print volume is available as an affordable, well-formatted book for e-readers, tablets, and smartphones. **American Egyptologist** Jeffrey Abt, 2012-05-01 James Henry Breasted (1865-1935) had a career that epitomizes our popular image of the archaeologist. Daring, handsome, and charismatic, he traveled on expeditions to remote and politically unstable corners of the Middle East, helped identify the tomb of King Tut, and was on the cover of Time magazine. But Breasted was more than an Indiana Jones—he was an accomplished scholar, academic entrepreneur, and talented author who brought ancient history to life not just for students but for such notables as Teddy Roosevelt and Sigmund Freud. In *American Egyptologist*, Jeffrey Abt weaves together the disparate strands of Breasted's life, from his small-town origins following the Civil War to his evolution into the father of American Egyptology and the founder of the Oriental Institute in the early years of the University of Chicago. Abt explores the scholarly, philanthropic, diplomatic, and religious contexts of his ideas and projects, providing insight into the origins of America's most prominent center for Near Eastern archaeology. An

illuminating portrait of the nearly forgotten man who demystified ancient Egypt for the general public, American Egyptologist restores James Henry Breasted to the world and puts forward a brilliant case for his place as one of the most important scholars of modern times.

**Pioneer to the Past** Charles Breasted, 2020-12-31 *Pioneer to the Past* tells the intensely human, often poignantly moving story of the brilliant career of James Henry Breasted, one of the greatest Egyptologists and archaeologists America has yet produced. Breasted's greatest achievement was the founding of the Oriental Institute at the University of Chicago in 1919, through the generous support of John D. Rockefeller, Jr. The Oriental Institute embodies Breasted's vision of an interdisciplinary research center that unites archaeology, textual studies, and art history as three complementary methodologies to provide a holistic understanding of ancient Near Eastern civilizations, and the ways that they laid the foundations for what we think of today as Western civilization. Breasted's legacy continues to flourish today. Reprint of the Scribner's Sons 1943 Edition, with New Foreword and Photographs.

The Origins of Civilization James Henry Breasted, 1919

A Brief History of Ancient Times James Henry Breasted, 2003-01-01 From the smallest of the atoms to the grandest of galaxies, every thing in the universe has its history. The known history of civilized peoples on this planet is no different, and yet each of us can touch no more than the smallest part of it. It is through books such as this one, which cover a comprehensive span of our history, that we are able to acquaint ourselves with the great, and some not so great, civilizations that preceded our own. From the early stone age, the great civilizations of Babylonia and Sumeria, the era of pyramid building, and the Hebrew and Persian empires, to the better-known republics of the Greek and Romans; these advanced cultures helped to provide a basic understanding of who we are as a species. The varied ways in which these previous cultures have influenced successive descents is nearly unlimited. The earliest of civilized man brought us an understanding of

fire and manufactured tools. From these early beginnings, the more advanced cultures, which begin our recorded history, have contributed greatly to our society. For example, the first recorded civilization on earth, the Sumerians, provided the basis for our modern-day writing, agriculture, astronomy, mathematics, calendar, numeral system, time reckoning, educational institutions, our code of laws, construction trades, metallurgy, art, and religion. They were they masters of invention, science, industry, and of exploration, which is important, because all that we have, and are, come from these sources. Our predecessors have helped man become a master of nature and to extend his physical abilities beyond the norm. We can only hope that the achievements and advancement of knowledge will be duly recorded for future generations and for the future of mankind. As a professor of Oriental History and Egyptology at the University of Chicago in the 1920s, Professor James Henry Breasted provides a qualified historical perspective and a sound account of the achievements of Western civilization. This book was skillfully written from the author's vast wisdom and scholarship of the nations of the world. In the past, the teaching of history has so often lacked both the scope and comprehensiveness that this small volume offers. For this reason, this book will make a fine addition to any library on ancient history.
