J. Steinberger

La radioattività intorno a noi Giovanni Vittorio Pallottino,2014-03-31

L'anima delle macchine Paolo Gallina,2015-02-10 Questo saggio ruota attorno a un'ipotesi impopolare: abbiamo bisogno di macchine e tecnologia come di amore e ossigeno. L'autore dà corpo alla tesi descrivendo sia gli aspetti tecnologici delle macchine, che tendono a diventare sempre più «simili all'uomo», sia il rapporto emotivo dell'uomo con la macchina. Forte di un'attiva ricerca sul campo, l'autore mescola con irriverenza ed equilibrio casi scientifici a esperienze quotidiane di vita domestica, fornendo un quadro insospettato e convincente della nostra dipendenza tecnologica. Per raggiungere tale scopo, adotta uno stile semplice e lineare, a tratti divertente, condito di molti esempi, come «la tortura di una formica», «i fumetti manga» e la «ricerca della felicità». Alla fine di questo viaggio scientifico, il lettore arriverà a comprendere i meccanismi consci e inconsci con cui la mente umana si adatta ai robot, ai prodotti digitali e agli innumerevoli sistemi di realtà virtuale che il genere umano ha costruito attorno a sé.

L'invenzione dell'altro Mondher Kilani,2015-10-01 Un unico filo rende coerente questa raccolta di saggi. Ed è la consapevolezza dell'arbitrarietà o della parzialità delle rappresentazioni che il discorso occidentale, anche quello antropologico, ha prodotto quando ha cercato di descrivere l'Altro. Decostruire la logica e i fondamenti della «invenzione dell'altro»; esplicitare la storicità delle condizioni di produzione della conoscenza antropologica (i rapporti di dominio, l'appartenenza dell'antropologo a una cultura dominante); sottoporre a critica nozioni-cardine come sapere e credenza, alterità e identità, uguaglianza e gerarchia, tradizione e modernità: sono i presupposti per ricostruire un'antropologia che si sottragga sia alle trappole del relativismo, sia al solipsismo dell'antropologia «postmodernista». Attraverso il resoconto delle ricerche in Papua-Nuova Guinea, nelle oasi del Sud tunisino, nelle Alpi del Vallese, in Svizzera, negli spazi urbani dell'immigrazione maghrebina in Francia, Kilani mostra come sia possibile una «invenzione dell'altro» più consapevole della problematicità del rapporto soggetto-oggetto e dunque meno etnocentrica.

Learning About Particles - 50 Privileged Years J. Steinberger, 2005 Embedded in an autobiographic framework, this book retraces vividly and in some depth the golden years of particle physics as witnessed by one of the scientists who made seminal contributions to the understanding of what is now known as the Standard Model of particle physics. Well beyond a survey of interest to historians of sciences and researchers in the field, this book is a must for all students and young researchers who have learned about the theoretical and experimental facts that make up the standard model through modern textbooks only. It will provide the interested reader with a first hand account and deeper understanding of the multilayered and sinuous development that finally led to the present architecture of this theory.

ANNO 2022 L'AMBIENTE QUARTA PARTE ANTONIO GIANGRANDE, Antonio Giangrande, orgoglioso di essere diverso. ODIÒ OSTENTAZIONE, IMPOSIZIONE E MENZOGNA. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti son fatti oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Our House is on Fire Malena Ernman, Greta Thunberg, Beata Ernman, Svante Thunberg, 2020-03-05 The profoundly moving story of how love, courage and determination brought Greta Thunberg's family back from the brink 'Urgent, lucid, courageous ... a must-read message of hope ... It is a glimpse of a saner world' David Mitchell, Guardian This is the story of a happy family whose life suddenly fell apart, never to be the same again. Of two devoted parents plunged into a waking nightmare as their eleven-year-old daughter Greta stopped speaking and eating, and her younger sister struggled to cope.

They desperately searched for answers, and began to see how their children's suffering reached far beyond medical diagnoses. This crisis was not theirs alone: they were burned-out people on a burned-out planet. And so they decided to act. *Our House is on Fire* shows how, amid forces that tried to silence them, one family found ways to strengthen, heal, and gain courage from the love they had for each other - and for the living world. It is a parable of hope and determination in an emergency that affects us all.

Food Bites Richard W Hartel, AnnaKate Hartel, 2009-03-01 *Food Bites* is an easy-to-read, often humorous book on the scientific basis of the foods we eat, and answers those pesky, niggling questions such as: Is the quality of beer really affected by the type of water used? and Processed foods: good or bad? Readers will be captivated by this superbly written book, especially so as their guides are Professor Richard Hartel, professor of Food Engineering at UW-Madison, along with his daughter, AnnaKate Hartel. Professor Hartel has for the last four years penned a witty and illuminating column on all aspects of food science for the *Capital Times* of Madison, and his weekly wisdom has now been collected into a single publication. With a huge and growing interest in the science of food, this treasure trove of knowledge and practical information, in 60 bite-sized chunks, is sure to be a bestseller.

Bracing for Armageddon Dee Garrison, 2006-03-30 In *Bracing for Armageddon*, Dee Garrison pulls back the curtain on the U.S. government's civil defense plans from World War II through the end of the Cold War. Based on government documents, peace organizations, personal papers, scientific reports, oral histories, newspapers, and popular media, her book chronicles the operations of the various federal and state civil defense programs from 1945 to contemporary issues of homeland security, as well as the origins and development of the massive public protest against civil defense from 1955 through the 1980s. At a time of increasing preoccupation over national security issues, *Bracing for Armageddon* sheds light on the growing distrust between the U.S. government and its subjects in postwar America.

Criminal Justice Forecasts of Risk Richard Berk,2012-04-06 Machine learning and nonparametric function estimation procedures can be effectively used in forecasting. One important and current application is used to make forecasts of “future dangerousness to inform criminal justice decision. Examples include the decision to release an individual on parole, determination of the parole conditions, bail recommendations, and sentencing. Since the 1920s, risk assessments of various kinds have been used in parole hearings, but the current availability of large administrative data bases, inexpensive computing power, and developments in statistics and computer science have increased their accuracy and applicability. In this book, these developments are considered with particular emphasis on the statistical and computer science tools, under the rubric of supervised learning, that can dramatically improve these kinds of forecasts in criminal justice settings. The intended audience is researchers in the social sciences and data analysts in criminal justice agencies.
