Todd McGowan

Cannibal. Nelle fauci di Wall Street Jared Dillian, 2013

Cannibal Jared Dillian, 2013-03-26 Il racconto viscerale di sette anni, quelli fondamentali, di un trader nel ventre della bestia: la più illuminante fotografia della crisi che ci sta divorando.

Art on My Mind bell hooks, 2025-05-27 The canonical work of cultural criticism by the “profoundly influential critic” (Artnet), in a beautiful thirtieth-anniversary edition, featuring a new foreword by esteemed visual artist Mickalene Thomas. Called “one of the country’s most influential feminist thinkers” by Artforum, bell hooks and her work have enjoyed a huge resurgence of popularity since her passing in 2021. Her 2018 book *All About Love* has sold upwards of 700,000 copies, and posthumous tributes have credited her with being “instrumental in cracking open the white, western canon for Black artists” (Artnet). To celebrate the thirtieth anniversary of her groundbreaking essay collection *Art on My Mind*, The New Press will publish a handsome, celebratory edition, featuring a new foreword by Tony-nominated producer and all-around creative phenom Mickalene Thomas and a new cover featuring original photos of bell hooks shot by African American photojournalist Eli Reed. This classic work, which, as the New York Times wrote, “examines the way race, sex and class shape who makes art, how it sells and who values it,” includes what Artforum calls “incisive essays” on the work of Jean-Michel Basquiat, Isaac Julien, Carrie Mae Weems, and Romare Bearden, among others. Her essays on Black vernacular architecture, representation of the Black male body, and the creative process of women artists, are complemented by conversations with Carrie Mae Weems, Emma Amos, Margo Humphrey, and LaVerne Wells-Bowie, which Kirkus Reviews calls “excellent indeed,” and “a real contribution to our understanding of the situation of black women artists.”

Strategic Communication in Context: Theoretical Debates and Applied Research Sara Balonas, Teresa Ruão, María-Victoria Carrillo, 2021-07-30 Strategic communication is becoming more relevant in communication sciences, though it needs to deepen its reflective practices, especially considering its potential in a VUCA world — volatile, uncertain, complex and ambiguous. The capillary, holistic and result-oriented nature that portrays this scientific field has led to the imperative of expanding knowledge about the different approaches, methodologies and impacts in all kinds of organisations when strategic communication is applied. Therefore Strategic Communication in Context: Theoretical Debates and Applied Research assembles several studies and essays by renowned authors who explore the topic from different angles, thus testing the elasticity of the concept. Moreover, this group of authors represents various schools of thought and geographies, making this book particularly rich and cross-disciplinary.

Companion Animals and Domestic Violence Nik Taylor, Heather Fraser, 2019-02-03 In this book, Nik Taylor and Heather Fraser consider how we might better understand human-animal companionship in the context of domestic violence. The authors advocate an intersectional feminist understanding, drawing on a variety of data from numerous projects they have conducted with people, about their companion animals and links between domestic violence and animal abuse, arguing for a new understanding that enables animals to be constituted as victims of domestic violence in their own right. The chapters analyse the mutual, loving connections that can be formed across species, and in households where there is domestic violence. Companion Animals and Domestic Violence also speaks to the potentially soothing, healing and recovery oriented aspects of human-companion animal relationships before, during and after the violence, and will be of interest to various academic disciplines including social work, anthropology, sociology, philosophy, geography, as well as to professionals working in domestic violence or animal welfare service provision.

The Protohistoric Pueblo World, A.D. 1275-1600 E. Charles Adams, Andrew I. Duff, 2016-04 In the centuries before the arrival of Europeans, the Pueblo world underwent nearly continuous reorganization. Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande, the Little Colorado River, and the Mogollon Rim, where they began constructing larger and differently organized villages, many with more than 500 rooms. Villages also tended to occur in clusters that have been interpreted in a number of different ways. This book describes and interprets this period of southwestern history immediately before and after initial European contact, A.D. 1275-1600—a span of time during which Pueblo peoples and culture were dramatically transformed. It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms. Twelve of the chapters individually examine the northern and eastern

portions of the Southwest and the groups who settled there during the protohistoric period. The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters. These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances, and in some cases they reveal a connection between protohistoric villages and indigenous or migratory groups from the preceding period. This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit. By analyzing how members of clusters of villages interacted with one another, it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research. In addition to offering new insights on the Pueblo IV world, the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms. It will be of lasting interest not only to archaeologists but also to geographers, land managers, and general readers interested in Pueblo culture.

The Day Giuseppe Parini, Herbert Morris Bower, 2010-04-01 One of the most studied and popular works of Italian literature, Giuseppe Parini's *The Day* has been unjustly neglected in the English-speaking countries. This edition reissue of Herbert Morris Bower's beautiful verse translation, the only complete English version of the poem, is enriched by facing original text and extra end notes. Parini's satirical description of a lazy young nobleman's fashionable day, from his awakening late in the morning to the fatuous pleasures that noon and evening bring, has been often compared to *The Rape of the Lock*, and displays the same gentle tone, pointed wit, and enduring charm of Pope's masterpiece.

Universality and Identity Politics Todd McGowan, 2020-07-21 The great political ideas and movements of the modern world were founded on a promise of universal emancipation. But in recent decades, much of the Left has grown suspicious of such aspirations. Critics see the invocation of universality as a form of domination or a way of speaking for others, and have come to favor a politics of particularism—often derided as “identity politics.” Others, both centrists and conservatives, associate universalism with twentieth-century totalitarianism and hold that it is bound to lead to catastrophe. This book develops a new conception of universality that helps us rethink political thought and action. Todd McGowan argues that universals such as equality and freedom are not imposed on us. They emerge from our shared experience of their absence and our struggle to attain them. McGowan reconsiders the history of Nazism and Stalinism and reclaims the universalism of movements fighting racism, sexism, and homophobia. He demonstrates that the divide between Right and Left comes down to particularity versus universality. Despite the accusation of identity politics directed against leftists, every emancipatory political project is fundamentally a universal one—and the real proponents of identity politics are the right wing. Through a wide range of examples in contemporary politics, film, and history, *Universality and Identity Politics* offers an antidote to the impasses of identity and an inspiring vision of twenty-first-century collective struggle.

Single-Cell-Based Models in Biology and Medicine Alexander Anderson, Katarzyna Rejniak, 2007-08-08 Aimed at postgraduate students in a variety of biology-related disciplines, this volume presents a collection of mathematical and computational single-cell-based models and their application. The main sections cover four general model groupings: hybrid cellular automata, cellular potts, lattice-free cells, and viscoelastic cells. Each section is introduced by a discussion of the applicability of the particular modelling approach and its advantages and disadvantages, which will make the book suitable for students starting research in mathematical biology as well as scientists modelling multicellular processes.
