Il Girasole Il Girasole,

**Girasole : Une Maison Près de Vérone** Marcel Meili, Christoph Schaub, 2010 On the slope of a gentle hill on the northern boundary of the Po basin in Northern Italy stands a remarkable house. A modernist villa in the middle of a park, with its metallic facade shining above an enormous circular base of reddish stone. The extraordinary structure of the Casa Girasole (The Sunflower) follows the way of the sun across the sky - and the inhabitants' vista over the surrounding landscape - during the day, driven by an electric motor that can turn the entire house by 360 . It was built in the early 1930s by the Italian architects Angelo Invernizzi and Ettore Fagioli and is an important example of Italian Futurismo in architecture. Preserved entirely in its original state, including the original furniture and curtains, it makes traceable the fascination for modern technology, but also the already slightly broken optimism, of that period. The documentary film 'I Girasole: A House Near Verona' by Christoph Schaub and Marcel Meili enables the viewer to take part in a day at the house that turns around its vertical axis once. The movie introduces both the architecture and atmosphere of the building, its various rooms, furnishings and decoration. It gives a memoir of the house's history and of the time and feeling of life in which it was conceived. The film was awarded the 1st prize at the 1995 biennale Film and Architecture in Graz (Austria). The DVD is complemented by a booklet with introductory essays and illustrations.

**Cars and Trucks on the Road** Alessia Girasole, 2018-06-05 This charming and witty can-you-find-it large-format board book follows one purple car from road to road while a succession of other vehicles joins it. Each spread also features a certain number of hidden items for children to find. Will kids be able to find the 10 bluebirds alongside the lone purple car? What about the two black limousines and nine potted plants? It all culminates in the final gatefold spread, which reveals a tremendous traffic jam with every car from the previous spreads! Children will spend hours poring over this book as they

search for their favorite vehicles and reoccurring characters on every page. They'll also find mini-stories within the main story (will the giraffe bike messenger find his lost wallet?), and several hidden items on every page. Numbers and colors are clearly indicated on each spread, and although certainly busy, each spread is carefully designed to provide just the right amount of challenge to young children.

*A Selection of Modern Italian Poetry in Translation* Roberta L. Payne, 2004 What was Italian poetry like in the years of extraordinary historical, intellectual, aesthetic, and spiritual change between the 1860s and the Unification of Italy in the 1960s? In *A Selection of Modern Italian Poetry in Translation* Roberta Payne provides a bilingual collection of ninety-two poems by thirty-five Italian poets, including works of classicism and passionate decadentism, examples of crepuscularism, and poetry by Ungaretti, Montale, and Quasimodo. Payne pays particular attention to poets of the fifties and sixties, futurists, and female poets. She notes that the futurists, who have rarely been translated, were particularly important as they were truly original, attempting to develop new notions of word, line, sound, and phrase. Such new notions make translating them particularly challenging. She also offers a large sampling from poets of the fifties and sixties, many of whom have won the Viareggio Prize. Poems by women in this volume reflect diverse schools and directions while maintaining a distinctly female voice. Containing the original Italian and the translation side-by-side, this volume offers a wonderful introduction to Italian poetry to scholars and general readers alike.

**Revolving Architecture** Chad Randl, 2008-05-15 Alternately lauded as the future of architecture or dismissed as pure folly, revolving buildings are a fascinating missing chapter in architectural history with surprising relevance to issues in contemporary architectural design. Rotating structures have been employed to solve problems and create effects that stationary buildings can't achieve. Rotating buildings offered ever-changing vistas and made interior spaces more flexible and adaptable. They were used to impress visitors, treat patients, and improve the green qualities of a structure by keeping particular rooms in or out of the sun. The follow-up to his critically acclaimed book *A-frame*, Chad Randl's *Revolving Architecture: A History of Buildings that Rotate, Swivel, and Pivot* explores the history of this unique building type, investigating the cultural forces that have driven people to design and inhabit them. *Revolving Architecture* is packed with a variety of fantastic revolving structures such as a jail that kept inmates under a warden's constant surveillance, glamorous revolving restaurants, tuberculosis treatment wards, houses, theaters, and even a contemporary residential building whose full-floor apartments circle independently of each other. International examples from the late 1800s through the present demonstrate the variety and innovation of these dynamic structures.

**Raw Vegetable Juices** Norman Wardhaugh Walker, 2003 What's missing on your bookshelf? This new addition!! The lack or deficiency of certain elements, such as vital organic minerals and salts from our customary diet is the primary cause of nearly every sickness and disease. How can we most readily furnish our body with the elements needed? It is hoped that this

delightful book will prove to be of considerable help to those who wish to derive the utmost benefit from natural food.

**Satellite Communications and Navigation Systems** Enrico Re, Marina Ruggieri, 2007-12-19 Satellite Communications and Navigation Systems publishes the proceedings of the 2006 Tyrrhenian International Workshop on Digital Communications. The book focuses on the integration of communication and navigation systems in satellites.

**The 7-Minute Back Pain Solution** Gerard Girasole, Dr. Gerard Girasole, Cara Hartman, 2012-03-20 An orthopedic spine surgeon and a personal trainer join forces to share a proven program that helps relieve back pain and prevents it from happening again through daily stretches and exercises that strengthen the core and protect the spine.

**The Architecture of Rome** Ulrich Fürst, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the 'eternal city'. Rome is eternal above all because it was always young, always 'in its prime'. Here the buildings that defined the West appeared over more than 2000 years, here the history of European architecture was written. The foundations were laid even in ancient Roman times, when the first attempts were made to design interiors and thus make space open to experience as something physical. And at that time the Roman architects also started to develop building types that are still valid today, thus creating the cornerstone of later Western architecture. In it Rome's primacy remained unbroken -- whether it was with old St Peter's as the first medieval basilica or new St. Peter's as the building in which Bramante and Michelangelo developed the High Renaissance, or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna, Bohemia and Lower Franconia, and also with Modern buildings, of which there are many unexpected pearls to be found in Rome. All this is comprehensible only if it is presented historically, i. e. in chronological sequence, and so the guide has not been arranged topographically as usual but chronologically. This means that one is not led in random sequence from a Baroque building to an ancient or a modern one, but the historical development is followed successively. Every epoch is preceded by an introduction that identifies its key features. This produces a continuous, lavishly illustrated history of the architecture of Rome -- and thus at the same time of the whole of the West. Practical handling is guaranteed by an alphabetical index and detailed maps, whose information does not just immediately illustrate the historical picture, but also makes it possible to choose a personal route through history.

**Key Houses of the Twentieth Century** Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century, For each of the houses included there are numerous, accurate scale plans showing each floor, together with elevations, sections and site plans where appropriate. All of these have been specially drawn for this book and are based on the most up-to-date information and sources.
